

PROPANE HEATED BRANDING TOOL

32309 MILTON AVE. MADISON HEIGHTS, MI 48071
PH: 888-583-5353 Fx: 248-588-0051

- 1) Make sure the valves on the propane branding tool & your propane tank are in the OFF position.
- 2) Verify that the branding head is no closer than 2" from the torch head.
- 3) Connect the propane branding tools' hose to your propane tank using the hand-tighten POL fitting.
- 4) Turn your propane tank valve to its fully OPEN position.
- 5) Open the valve on the branding tool 1/4 turn & light the flame with a BBQ lighter or spark ignitor.
- 6) Once lit, open the branding tools valve completely & allow the torch to heat the branding head for approximately 5 minutes. Turn the valve completely OFF, and test brand a piece of scrap material. If the branding head is not hot enough to provide an acceptable brand, reheat the branding head in 2 minute increments until desired brand is obtained.

WARNING: FLAME MUST BE TURNED OFF WHILE BRANDING. LEAVING THE TORCH FLAME ON FOR AN EXTENDED PERIOD OF TIME WILL CAUSE DAMAGE TO THE BRAND TOOL. OPERATE THIS TOOL OUTDOORS OR IN A WELL VENTILATED AREA ONLY.
